ALL WORK SERVICES

WELCOME TO ALL WORK SERVICES

Founded in 2018 by **Jesse Burgess**, All Work Services began life as All Spark Works, a small family business started by Jesse and his dad. What began with electrical work soon evolved into a passion for renewable energy, leading to the creation of All Solar Works — at a time when solar power was only just beginning to rise in popularity.

As solar energy began to transform the way people power their homes, Jesse made the decision to fully commit to renewable energy and build something bigger. That vision has grown into **four specialist divisions** that now sit proudly under one family brand:

ALL WORK SERVICES
The parent company that unites them all

ALL SOLAR WORKS
Solar PV, battery storage & EV charging

ALL ROOFING WORKS
Roofing, repairs & solar integration

ALL HEATING WORKS
Renewable heating & air source heat pumps

Today, All Work Services is a family-run business led by Jesse alongside his wife Sammy, who manages the administration and customer service side, and Dan, our Chief Operating Officer who oversees daily operations. Together with a talented team of over 18 engineers, we deliver professional, high-quality renewable installations across the South Coast. Our commitment goes beyond installation — we're here to guide you on your energy journey for years to come. We believe in honest advice, transparent service, and helping our customers make smarter choices that benefit both their wallets and the planet.

You can visit our Sussex's First Renewable Showroom, located at:
1 Broadwater Boulevard, Worthing, BN14 8JE

Pop in anytime, enjoy a coffee with one of our experts, and explore how solar panels, batteries, and renewable heating could work best for your property.

MEET THE TEAM THAT POWERS YOUR RENEWABLE FUTURE

VISIT OUR BRAND NEW SHOWROOM AT NO.1 BROADWAY BOULEVARD, WORTHING

VISION STATEMENT

"Our vision is to be the South Coast's leading renewable energy installers — not just as experts, but as lifelong energy advisers.

We want to create a community of happy customers who trust us to help them save money, reduce their carbon footprint, and enjoy sustainable living for years to come.

— Jesse Burgess, Founder

epvs CERTIFIED MEMBER

WHAT OUR
CUSTOMERS SAY

Uzoma Nwosu

★★★★★

"All Solar Works were fantastic to deal with, From the first phone call to the installation and aftercare, everything ran smoothly. The team were knowledgeable, friendly, and explained everything clearly. Their aftercare service has been excellent – always available to help and quick to respond. Highly recommend!"

George Eccles

★★★★★

"Jesse, Sammy and all their team performed like true professionals. Everything was arranged and managed tiemously, the installation was very quick and efficient and everything was cleaned up after. The price was very good and the solar panels and battery are doing their job. Thank you all - highly recommended"

Andy Taylor

★★★★★

"Dealing with All Solar Works has been an absolute pleasure! As a business owner myself, it was refreshing to work with a company that truly values professionalism, clear communication, and outstanding customer care. From the initial consultation through to the final installation, they were first class. Even weeks after the install, they continue to monitor how I'm getting on with the new system — nothing is ever too much trouble. I did my homework when considering a solar system, and All Solar Works stood out as the most impressive and thorough company I engaged with. In the end, it was an easy decision to give them my order. I wouldn't hesitate to recommend them for any solar needs — you'd be making a mistake going elsewhere!"

ALL WORK SERVICES

ALL WORK SERVICES

SMARTER ENERGY FOR YOUR HOME

Solar PV

Solar PV panels convert sunlight into electricity using the photovoltaic effect. The energy powers your home through an inverter and can be stored in batteries for later use or exported back to the grid. This reduces energy bills, increases independence, and cuts carbon emissions.

Air Source Heat Pumps

Air Source Heat Pumps extract heat from the air, even in cold weather, to efficiently heat your home and water. They use a refrigerant system to transfer warmth indoors, delivering up to four times more heat energy than the electricity they use.

Bespoke Designs

Every system is custom-designed to your property for maximum efficiency and performance — ensuring you get the best return and the lowest running costs.

WE ONLY INSTALL THE BEST

- Solar services: assessment, design, supply, install, maintenance.
- Complete installation site suitability survey
- Check solar panel energy generation and savings
- Advice on planning and building regulation issues
- Site preparation before the installation process
- Assistance with connection to the national grid
- 10-year manufacturer's warranty
- Annual maintenance contracts with our approved installers

TESLA

POWERWALL

Powerwall 3 is a fully integrated solar and battery system designed to accelerate the world's transition to sustainable energy. Powerwall 3 can store solar or grid energy for later use when the sun goes down or when the electricity prices are high; lowering their electricity bills, reducing their reliance on the grid, and power their homes during a grid outage.

Up to 11KW output

Features:

- ✓ **Built-in Solar Inverter:** Efficiently converts solar energy into stored electricity, maximising the capture and utilisation of solar power.
- ✓ **Easy System Expansion:** Designed for scalability, allowing up to 4 units to be stacked as your household energy needs grow. Additionally, up to 3 DC expansion packs can be added to each Powerwall at any time.
- ✓ **Excellent Value:** Comes with a comprehensive 10-year warranty that includes unlimited cycles. Ensures 80% energy retention after 10 years and supports 100% depth of discharge.
- ✓ **Active Thermal Management:** Features a redesigned active thermal management system to enhance overall performance and efficiency.

BATTERIES & INVERTERS

Sigenergy is a forward-thinking energy company specialising in advanced home and commercial solutions — from residential batteries and solar inverters to EV chargers. Their world-class R&D team harnesses power electronics, digital and AI technologies to build safe, efficient systems that give homeowners and businesses real-time control and independence. With global reach and an ambition to let “everyone enjoy green energy and be energy independent”, Sigenergy is positioning itself as a trusted partner for the clean-energy transition.

Signenergy Battery & Inverter

Sigenergy’s advanced technology allows direct tapping into DC power from the battery and solar panel, enabling virtual grid capacity expansion and 100% green power charging. Get ready for the future with V2H (Vehicle-to-Home) and V2G (Vehicle-to-Grid) capabilities, unlocking limitless possibilities for modern living.

BATTERIES & INVERTERS

EcoFlow’s mission is simple: “Power a new world.” Since their founding in 2017, they have focused on delivering smart, eco-friendly energy solutions for individuals, families and mobile/off-grid use. From portable power stations to fully integrated home storage systems, EcoFlow blends innovation with accessibility — letting users harness clean power wherever they are.

EcoFlow PowerOcean

The EcoFlow PowerOcean redefines home energy storage with an advanced safety system, LFP battery tech, a fire prevention module, and and IP65-certified design. The EcoFlow PowerOcean comes with a 15-year warranty, with batteries expandable up to 15kWh while offering over 6,000 charge cycles. The EcoFlow PowerOcean is a secure, scalable, and future-proof power investment for your home.

H1 & AC1 Hybrid/AC Inverter

Harness the power of the sun day and night with the groundbreaking range of Hybrid & AC inverters from Fox ESS.

Full of advanced features and compatible with our very own range of high-voltage batteries, the hybrid range from Fox ESS, a new class of inverter.

Easy Installation
Flexible configuration, plug and play set-up, built-in fuse protection.

High Voltage
Includes high-voltage batteries for maximum round-trip efficiency.

1P65 Rated
Engineered to last with maximum flexibility. Suitable for outdoor installation.

Remote Monitoring
Monitor your system remotely via smartphone app or web portal.

BATTERIES & INVERTERS

FOX ESS is a global leader in cutting-edge inverter and energy storage solutions—engineered by top specialists in solar electronics and battery systems. Their products deliver advanced features, reliable performance and intelligent monitoring, giving you a smarter, more efficient way to manage your solar power and storage.

EVO Series

The Fox EVO Series 5kW is a powerful, all-in-one hybrid inverter and solar battery storage solution. Designed for seamless indoor or outdoor installation, this integrated system combines a high-performance 5kW inverter with a 10.24kWh lithium iron phosphate (LFP) battery and built-in Emergency Power Supply (EPS)—offering everything you need for reliable, efficient solar energy storage.

Features:

- ✔ All-in-one hybrid inverter + solar battery solution
- ✔ Sleek, minimalist design for any installation
- ✔ 95% Depth of Discharge
- ✔ Scalable storage up to 30.72kWh
- ✔ Easy installation

EV CHARGERS

FOX ESS

- Smart connectivity: Wi-Fi, Bluetooth, 4G/Ethernet + OCPP 1.6/2.0.1 compatibility
- Durable design: IP55 / IK08-10 weatherproof rating
- Solar integration & dynamic load balancing for efficient home energy use

SIGENERGY

- Smart control & scheduling via mySigen app
- Dynamic load management and bidirectional charging ready
- Optimised for solar-linked charging and compact installation

ECOFLOW

- Fast charging up to 9.6 kW (40 A)
- Smart-home & solar integration with app scheduling
- Plug-and-play setup, outdoor-rated (NEMA 4) durable design

TESLA

- High-power home charging up to 11.5 kW
- Wi-Fi connectivity with over-the-air software updates
- Universal compatibility across Tesla and select non-Tesla EVs

ESSENTIALS

All Solar Works gold package includes all of the following:

- ☑ **All parts and labour**
- ☑ **Scaffolding**
- ☑ **App setup & commissioning**
- ☑ **New metal clad consumer unit**
- ☑ **Surge protection**
- ☑ **Lifetime remote monitoring**
- ☑ **Waste removal**
- ☑ **Black metal bird mesh**
- ☑ **DNO G99 applications**
- ☑ **MCS certification**
- ☑ **NICEIC part P certification**
- ☑ **Warranty registration**
- ☑ **House protection**
- ☑ **Insurance-backed guarantees**
- ☑ **EPVS certificate**

AIR SOURCE HEAT PUMPS

DAIKIN

Daikin Air Source Heat Pump

Daikin is a world leader in heating and cooling innovation, trusted for its advanced air source heat pump technology that delivers outstanding comfort and efficiency. With over 90 years of engineering excellence, Daikin systems are designed to provide sustainable, low-carbon heating while reducing energy costs. Combining smart controls, quiet performance, and premium build quality, Daikin offers a reliable solution for modern, energy-efficient homes.

Features:

- ✔ High efficiency: inverter-driven compressor delivers up to ~4 kW of heat for every 1 kW of electricity used
- ✔ Wide operating range: effective even in very cold conditions (down to –25 °C outdoors)
- ✔ Integrated heating + hot water: single system supplies both space heating and domestic hot water
- ✔ Standard manufacturer's warranty: 2 years
- ✔ Environmentally friendly: uses low-GWP refrigerants and all-electric operation to minimise carbon footprint

ALL WORK SERVICES

AIR SOURCE HEAT PUMPS

ECOFLOW

ECOFLOW Air Source Heat Pump

EcoFlow Heat Pumps combine smart technology, renewable energy integration, and exceptional efficiency to deliver sustainable home heating and hot water. Designed with the innovative R290 low-carbon refrigerant, these systems provide powerful performance even in cold climates while keeping emissions ultra-low.

Fully compatible with solar power and controlled via the EcoFlow App, users can easily monitor energy use, schedule heating, and optimise comfort from anywhere. With quiet operation, modern design, and intelligent inverter technology, EcoFlow Heat Pumps offer a next-generation heating solution that's efficient, eco-friendly, and built for the future of home energy independence.

Features:

- ✔ Inverter-driven compressor for efficient, adaptive heating performance
- ✔ Uses eco-friendly R290 refrigerant (low GWP < 20)
- ✔ Smart app control for temperature, scheduling, and energy monitoring
- ✔ Solar-compatible to maximise self-consumption and reduce grid reliance
- ✔ Available in 9 kW and 20 kW models with wide operating range (–25 °C to 43 °C)
- ✔ Warranty periods vary by product line. For example: portable power stations typically covered for 24 months, and some items extend to 5 years for registration-eligible models.

GAS BOILERS

Glow-worm

Glow Worm Gas Boiler

Glow-worm boilers are a trusted UK heating brand with roots stretching back to 1934, now part of the Vaillant Group. They offer a versatile range of high-efficiency combi, system and regular boilers, designed for reliability, value and ease of installation. Built with modern condensing technology and compact designs, Glow-worm boilers deliver excellent performance and energy savings for UK homes.

Features:

- Up to A-rated efficiency for heating and hot water
- Compact, space-saving design ideal for most homes
- Quiet operation with durable aluminium heat exchangers
- Flexible flue options for easier installation
- Smart control compatibility for modern home energy management
- Wide model range to suit different household needs
- Typical guarantee durations: Energy series 7 years standard

ALL WORK SERVICES

GAS BOILERS

WORCESTER Bosch Group

Worcester Bosch Gas Boiler

Worcester Bosch is a leading UK boiler brand known for high efficiency, reliable performance and strong installer support. Their boilers suit new builds and retrofit homes, with options across combi, system and regular types.

Features:

- A-rated energy efficiency for lower running costs and reduced emissions
- Compact, space-saving design for flexible installation
- Quiet operation with advanced engineering and easy-to-use controls
- Smart thermostat and renewable-ready compatibility
- Wide range of combi, system, and regular models for all home sizes
- Up to 10 years when installed by a Worcester Accredited Installer and using a system filter.

ALL WORK SERVICES

GAS BOILERS

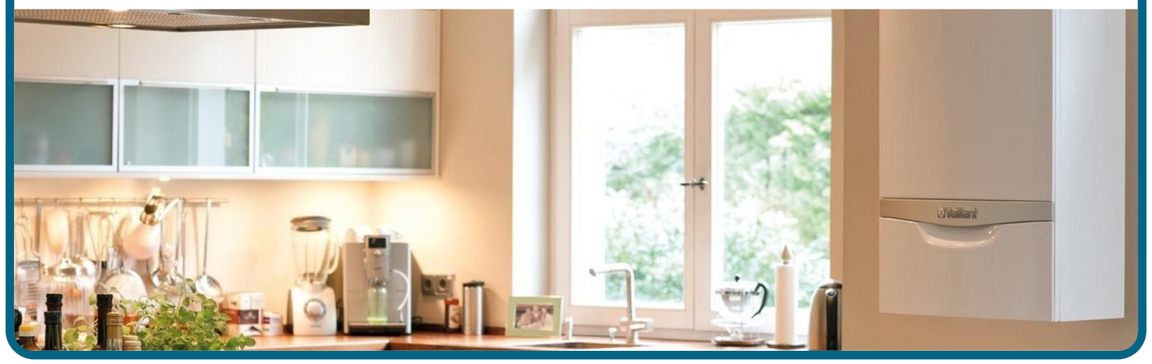

Vaillant
Gas Boiler

Vaillant is a premium UK & European heating brand offering advanced boiler and heat pump technology, combining smart controls, efficiency and quality build for modern heating systems.

Features:

- Premium German engineering with A-rated efficiency
- Smart control options and intelligent combustion technology
- Quiet, compact design with built-in frost protection
- Fast, consistent hot water delivery
- Suitable for small homes to large properties with high demand
- Standard guarantee period varies by model typically 2-5 years.

AIR CONDITIONING

Daikin Air Conditioning Unit

Features:

- Inverter technology for smooth, energy-efficient cooling and heating
- Uses eco-friendly R32 refrigerant with low global warming potential
- High energy efficiency ratings for reduced running costs
- Quiet operation – ideal for bedrooms and living spaces
- Smart control via Wi-Fi or mobile app for remote temperature management
- Advanced air filtration and purification for cleaner indoor air

ALL ROOFING WORKS - BUILT TO LAST

Solar-Integrated Roofing Solutions

Our roofing division specialises in seamlessly integrated solar roofing systems, combining advanced solar PV technology with durable, weatherproof roofing materials. This means your roof doesn't just protect your home — it generates clean, renewable energy while maintaining a sleek, modern appearance. Every installation is designed to maximise efficiency and aesthetic appeal, ensuring a perfect balance between performance and style.

Trained Roofing Engineers – Not Subcontracted

All installations are carried out by our in-house team of trained roofing engineers, not subcontractors. This guarantees consistent quality, attention to detail, and accountability on every project. Our engineers are fully certified and experienced in both traditional roofing and solar integration, ensuring every system is installed to the highest professional and safety standards.

Weatherproofing Expertise & Full Warranty

We understand that a roof is your home's first line of defence. That's why we apply industry-leading weatherproofing techniques to protect against rain, wind, and temperature extremes. All our roofing and solar systems come with a comprehensive warranty, giving you long-term peace of mind. From design to installation, we ensure your system is built to last, both structurally and electrically.

WHAT HAPPENS NEXT?

01
Select Your Service

Select Your Service: Choose from our range of services – Solar, heating and roofing

02
Initial Questions

Initial Questions: We'll ask you a few simple questions to understand your specific needs and guide us to the right products for you.

03
Carefully Selected Options

Carefully Selected Options: Based on your requirements, we'll present you with a selection of EV chargers, solar systems, heating options and roofs that have been carefully chosen to cater to your needs. Each option will have its own unique features.

04
Choose & Schedule

Choose and Schedule: Select the product that best suits your needs and preferences, and choose your desired installation date. If your preferred date is not available, we'll work with you to find a convenient alternative.

05
Installation Day

Installation Day: Our professional team will arrive at the agreed time on the scheduled installation day. They will confirm the selected products and installation locations before proceeding.

06
Thorough Testing

Thorough Testing: Once the installation is complete, our team will carry out comprehensive tests to ensure that everything is functioning correctly and safely.

07
Demonstration & Instructions

Demonstration and Instructions: We will provide a thorough demonstration of your new system, explaining its features and ensuring that you feel confident in operating it.

08
Documentation & Payment

Documentation and Payment: Instruction manuals will be provided, and installation certificates will be emailed to you shortly after. Once you are completely satisfied with the installation, we will request payment. We currently accept card, cheque, transfer, or Stripe via invoice.

By following this straightforward 8-step process, we aim to provide you with a seamless and hassle-free experience, ensuring that you are fully satisfied with your chosen service.

REWARDS FOR YOU

WE WILL PAY YOU

£500 PER SUCCESSFUL **INSTALL REFERRAL.**
£50 FOR **FOLLOWING, TAGGING, AND VIDEO TESTIMONIAL.**

Referee must go ahead within 28 days or be booked in and deposit paid. Rewards will be issued once all work is completed and paid for.
